

Art. No: **HP11500**

 Flexibel attachment that can adjust up to 445mm from a flat surface.

 Used on walls, arched edges, facades, shaft sides, flat bearing edges and more

 The upper mounting screw is pre-assembled and the key-hole allows the bracket to be securely hung in place, then another screw is inserted into that downhole to rotate the bracket securely.

This is a secure method that reduces the risks during installation and dismantling of the bracket.

 Hot dip galvanised.

 Complies with EN13374 Class A

 Weight: 5,0kg
